Profile

Junior C#/.NET developer currently completing the Northcoders bootcamp, with a strong interest in technology and software development. My interest developed through hands-on experience building and upgrading my own PC, which sparked my curiosity for problem-solving and software systems.

With a background in computing and experience working in structured, data-focused environments, I have developed a logical and detail-oriented approach. I particularly enjoy backend development and building reliable applications using clean and well-structured code.

I am now seeking a junior developer role where I can contribute to a team and continue developing my technical skills.

Technical Skills

Languages & Core: C#, .NET, Object-Oriented Programming, LINQ, Async Programming

Testing & Practices: Test-Driven Development (TDD), NUnit, Shouldly, Moq

Backend: ASP.NET Core, MVC, REST APIs

Databases: SQL Server, T-SQL, ADO.NET

Tools: Git, GitHub, Visual Studio, VS Code, PowerShell

Frontend: HTML, CSS

Projects

Record Shop API

Repository: github.com/Nazmul5765/record-shop-api

ASP.NET Core | C# | Entity Framework Core | SQL Server | NUnit | Moq | Shouldly

- Built a RESTful backend API for managing record shop inventory
- Created endpoints for adding, retrieving, and deleting albums
- Implemented Controllers, Services, and Repositories to maintain separation of concerns
- Used Entity Framework Core with SQL Server for data persistence
- Applied test-driven development using NUnit, Moq, and Shouldly
- Added a custom health check endpoint to monitor API and database availability

Professional Development

Northcoders Enterprise Engineering Bootcamp

March 2026 – Present

- Intensive training in C# and modern software development practices
- Applying object-oriented programming, clean code, and test-driven development in practical projects
- Solving coding challenges using logical thinking, debugging, and structured problem-solving
- Building backend applications and REST APIs using ASP.NET Core

Java Programming Masterclass (Udemy)

2025 – Present

- Learning core Java concepts including variables, control flow, arrays, and object-oriented programming
- Building foundational programming knowledge through practical exercises

Google IT Support Professional Certificate (Coursera)

2023

- Covered networking, operating systems, system administration, and IT security fundamentals

Work Experience

Visa Documentation Coordinator

PPV Worldwide Limited

London | 2023 – 2025

- Processed end-to-end visa applications, ensuring accuracy, compliance, and timely submission
- Used structured systems (Mosadaqa, QVP) for document verification and tracking application progress
- Maintained consistent and accurate client records across data-driven systems
- Communicated with clients and institutions to resolve issues efficiently
- Trained new staff on internal systems, procedures, and best practices

Food Delivery Courier

UberEats, Deliveroo & Stuart

London | 2017 – 2023

- Delivered orders efficiently while maintaining high customer satisfaction in a fast-paced environment
- Developed strong time management and route optimisation skills working independently
- Communicated effectively with customers and handled issues in real-time

Education

BSc (Hons) Computer Science (studied to final year)

Greenwich School of Management

2014 – 2017

- **Relevant modules:** Programming (Java & C#), Software Engineering, Database Management Systems, Systems Analysis and Design

BTEC Level 3 Extended Diploma in ICT

The College of Haringey, Enfield and North East London

2008 – 2012

- Modules included Software Design, Troubleshooting, Web Development, Databases, and E-Commerce

Interests

- Building personal coding projects outside the bootcamp to strengthen my C#/.NET skills and apply concepts in real scenarios
- Building and upgrading computer systems – interested in how hardware components work together and impact system performance
- Strength training, cardio and healthy eating – built a consistent routine after recognising the importance of long-term health, improving discipline and lifestyle habits
- Following developments in technology, including AI and emerging technologies, to stay up to date with new features; previously built and ran a small GPU-based cryptocurrency mining rig
