Profile

Aspiring C#/.NET developer currently completing the Northcoders bootcamp, with a long-standing interest in technology and how systems are built and function. My interest began at a young age through hands-on experience, including upgrading hardware and building my own PC, which developed my curiosity for problem-solving and system design.

With a background in computing and experience working in structured, data-focused environments, I have developed a logical and detail-oriented approach to problem-solving. I particularly enjoy backend development, where I can focus on building reliable, well-structured systems.

I am driven by a genuine interest in technology and continuous learning, and I am seeking a junior developer role where I can contribute to a team and continue developing my technical skills.

Technical Skills

Languages & Core: C#, .NET, Object-Oriented Programming, LINQ, Async Programming

Testing & Practices: Test-Driven Development (TDD), NUnit, Moq

Tools: Git, GitHub, Visual Studio, VS Code, PowerShell

Databases: SQL Server, T-SQL, Basic ADO.NET

Web & Backend (Learning): ASP.NET Core, MVC, HTML, CSS

Professional Development

Northcoders Enterprise Engineering Bootcamp

March 2026 – Present

- Intensive training in C# and modern software development practices
- Applying object-oriented programming, clean code, and test-driven development in practical exercises
- Completing coding challenges and collaborative exercises

Java Programming Masterclass (Udemy)

2025 – Present

- Learning core Java concepts including variables, control flow, arrays, and object-oriented programming
- Building foundational programming knowledge through practical exercises

Google IT Support Professional Certificate (Coursera)

2023

- Covered networking, operating systems, system administration, and IT security fundamentals

Work Experience

Visa Documentation Coordinator

PPV Worldwide Limited – Global Visa Consultant

London, UK | 2023 – 2025

- Managed end-to-end processing of visa applications, ensuring accuracy and compliance
- Used structured systems (Mosadaqa, QVP) for document verification and tracking
- Worked with structured, data-driven systems, ensuring consistency and accuracy across records
- Communicated with clients and institutions to resolve issues efficiently
- Trained new staff on systems and procedures

Food Delivery Courier

UberEats, Deliveroo & Stuart

London, UK | 2017 – 2023

- Delivered orders efficiently while maintaining high customer satisfaction
- Developed strong time management and route optimisation skills
- Communicated effectively with customers in fast-paced environments

Education

BSc (Hons) Computer Science (studied to final year)

Greenwich School of Management – London

2014 – 2017

- **Relevant modules:** Programming (Java & C#), Software Engineering, Database Management Systems, Systems Analysis and Design

BTEC Level 3 Extended Diploma in ICT

The College of Haringey, Enfield and North East London

2008 – 2012

- Modules included Software Design, Troubleshooting, Web Development, Databases, and E-Commerce

Additional Skills

- Strong attention to detail and accuracy
- Logical thinking and problem-solving
- Ability to learn quickly and adapt to new technologies
- Experience working with structured systems and data

Interests

- Coding and learning new technologies
- Chess
- Gym and fitness
- Technology trends
- Personal development
