

NAZMUL HUSSAIN

Junior C#/.NET Developer

London | 07392 730717 | nazmulhussain@hotmail.co.uk
github.com/Nazmul5765 | linkedin.com/in/nazmul-hussain

Profile

Junior C#/.NET developer who recently completed the Northcoders Enterprise Engineering bootcamp, with a strong interest in technology and software development. My interest developed through hands-on experience building and upgrading my own PC, which sparked my curiosity for problem-solving and software systems.

With a background in computing and experience working in structured, data-focused environments, I have developed a logical and detail-oriented approach. I particularly enjoy backend development and building reliable applications using clean and well-structured code.

I am looking forward to applying my skills in a junior developer role, continuing to develop as a software engineer, and contributing as a valued member of a team.

Technical Skills

Languages & Core:	C#, .NET, Java, Object-Oriented Programming, LINQ, Async Programming
Testing & Practices:	Test-Driven Development (TDD), NUnit, Shouldly, Moq, Agile Development
Backend:	ASP.NET Core, MVC, REST APIs, Dependency Injection, Entity Framework Core
Databases & ORM:	SQL Server, SQLite, T-SQL, ADO.NET
Tools:	Git, GitHub, Visual Studio, VS Code, PowerShell, Trello
Frontend:	Blazor, HTML, CSS

Projects

Calico – Full-Stack Productivity & Lo-Fi Music Application (Team Project)

GitHub: [Frontend Repository](#) | [Backend Repository](#)

ASP.NET Core | Blazor | C# | SQLite | Entity Framework Core | Supabase Authentication | JWT | YouTube API | Git | Trello

- Collaborated in a team to develop a full-stack productivity and lo-fi music application featuring music search, playlists, timers, projects and user accounts
- Pair programmed on YouTube API integration and music search functionality across the ASP.NET Core backend and Blazor frontend
- Developed a Pomodoro-style timer prototype integrated with music playback controls and task-tracking functionality
- Contributed to repository, service and controller development using ASP.NET Core and Entity Framework Core
- Participated in test-driven development (TDD), writing and maintaining unit tests using NUnit, Moq, and Shouldly
- Implemented custom API and database health checks to monitor application availability
- Worked using Agile practices including daily stand-ups, sprint planning, ticket management and collaborative Git workflows
- Contributed to dashboard functionality and user interface improvements using Blazor

Record Shop Application (Full Stack)

GitHub: [Frontend Repository](#) | [Backend Repository](#)

ASP.NET Core | Blazor | C# | SQL Server | Entity Framework Core | NUnit | Moq | Shouldly

- Built a full-stack record shop application using ASP.NET Core and Blazor
- Developed a RESTful API with CRUD operations for managing record inventory
- Built reusable Blazor components with routing, forms, and navigation
- Integrated frontend and backend systems using HttpClient and REST API communication
- Implemented record search, creation, editing, and deletion functionality
- Used Entity Framework Core with SQL Server for data persistence
- Applied test-driven development using NUnit, Moq, and Shouldly
- Added custom health checks to monitor API and database availability

Professional Development

Northcoders Enterprise Engineering Bootcamp

Mar 2026 – Jun 2026

- Intensive training in C# and modern software development practices
- Applying object-oriented programming, clean code, and test-driven development in practical projects
- Solving coding challenges using logical thinking, debugging, and structured problem-solving
- Building backend applications and REST APIs using ASP.NET Core

Java Programming Masterclass (Udemy)

2025 – Present (Self-Study)

- Learning core Java concepts including variables, control flow, arrays, and object-oriented programming
- Strengthening programming fundamentals through practical exercises and projects

Google IT Support Professional Certificate (Coursera)

2023

- Covered networking, operating systems, system administration, and IT security fundamentals

Work Experience

Visa Documentation Coordinator

PPV Worldwide Limited

London | Oct 2023 – Jul 2025

- Processed end-to-end visa applications, ensuring accuracy, compliance, and timely submission
- Used structured systems (Mosadaqa, QVP) for document verification and tracking application progress
- Maintained consistent and accurate client records across data-driven systems
- Communicated with clients and institutions to resolve issues efficiently
- Trained new staff on internal systems, procedures, and best practices

Food Delivery Courier

UberEats, Deliveroo & Stuart

London | Mar 2017 – Oct 2023

- Delivered orders efficiently while maintaining high customer satisfaction in a fast-paced environment
- Developed strong time management and route optimisation skills working independently
- Communicated effectively with customers and handled issues in real-time

Education

BSc (Hons) Computer Science (studied to final year)

Greenwich School of Management

2014 – 2017

- **Relevant modules:** Programming (Java & C#), Software Engineering, Database Management Systems, Systems Analysis and Design

BTEC Level 3 Extended Diploma in ICT

The College of Haringey, Enfield and North East London

2008 – 2012

- Modules included Software Design, Troubleshooting, Web Development, Databases, and E-Commerce

Interests

- Building personal coding projects outside the bootcamp to strengthen my C#/.NET skills and apply concepts in real scenarios
- Building and upgrading computer systems – interested in how hardware components work together and impact system performance
- Strength training, cardio and healthy eating – built a consistent routine after recognising the importance of long-term health, improving discipline and lifestyle habits
- Following developments in technology, including AI and emerging technologies, to stay up to date with new features; previously built and ran a small GPU-based cryptocurrency mining rig
